

# LAKSHYA KHANNA

Delhi, India | 7042023024 | Lakshya1khanna@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFILE

B.Tech IT student building Machine Learning, Generative AI, and full-stack applications. Skilled in Python, ML pipelines, LLM integration (Gemini, OpenRouter, Ollama), and REST APIs (FastAPI, Express). Shipped 5+ end-to-end projects. Seeking a Machine Learning / AI Engineering internship.

## SKILLS

**Languages:** Python, SQL, C

**Machine Learning:** NumPy, Pandas, Scikit-Learn, TF-IDF Vectorization, LinearSVC, Model Training & Inference Pipelines

**Generative AI / LLMs:** Gemini API, OpenRouter, Ollama, Prompt Engineering, Claude Code, Kiro, Antigravity

**Backend & Web:** FastAPI, REST API Design, Tailwind CSS

**Databases:** Supabase (PostgreSQL), Firebase Firestore, MySQL

**Tools & Deployment:** Git, GitHub, Vercel, Render, Railway, PM2, Cloudflare Tunnel, Chrome Extension APIs

**Embedded Systems:** ESP32 (C3 / S3), Arduino UNO

## EXPERIENCE

### Campus Ambassador — TRYST'24, IIT Delhi

*IIT Delhi's Annual Technical Festival | Jan 2024 – Mar 2024*

- Executed a social media strategy that drove a measurable rise in student registrations for TRYST'24 workshops and competitions.
- Designed and distributed promotional materials, boosting TRYST'24's visibility across the student body.
- Recognized among the top Campus Ambassadors with an official Letter of Recommendation and Certificate.

## PROJECTS

### SpecForge — AI PRD & Spec Generator | *Next.js, TypeScript, OpenRouter* — [github.com/Lakshya-Khanna-1/PRD-generator](https://github.com/Lakshya-Khanna-1/PRD-generator)

- Built a full-stack app that turns a raw product idea into agent-ready spec documents (spec.md, tasks.md, agents.md) via an AI clarify → brief → generate pipeline, streamed live with Server-Sent Events.
- Engineered a server-side LLM wrapper over OpenRouter with automatic fallback-model retry, Zod-validated JSON output, and per-IP rate limiting — API keys never reach the browser.
- Shipped a tabbed review UI with copy, per-doc regeneration, and one-click zip download (JSZip); integrated Sentry for error tracking.

### Focus Mode — AI Activity Classifier | *Python, Scikit-Learn, TF-IDF*

- Built a real-time productivity classifier that reads the active window/tab title every 10 seconds and predicts productive vs. distracting activity.
- Trained a LinearSVC model on 25,000+ labeled window titles using TF-IDF vectorization with 1-2 gram features.
- Shipped a monitoring script that triggers an alert after 5 minutes of sustained distraction, using pickled model artifacts for low-latency inference.

### VoiceGuard (VOIXTA) — AI Scam Call Detector | *Web Speech API, Web Audio API*

- Developed a privacy-first web app detecting live scam-call patterns (digital arrest, OTP/bank fraud, courier and investment scams) from voice or pasted text.
- Implemented on-device speech transcription and real-time waveform rendering — no audio or data leaves the browser.

## EDUCATION

### Bachelor of Technology, Information Technology

2025 – 2029 (Expected)

Guru Tegh Bahadur Institute of Technology (GGSIPTU), Delhi

### Diploma in German — St. Stephen's College, B1 Level (Result Awaited)

2025 – 2026

## CERTIFICATIONS

- Machine Learning Training — IIT Madras, Internshala Trainings (Sept–Oct 2025)
- Python Essentials for MLOps — Duke University, Coursera (Nov 2025–Jan 2026)

## LANGUAGES

English (Professional) • Hindi (Native) • Punjabi (Native) • German (B1 Diploma)
